Athletic Taping Technique

Athletic taping technique has been identified as a potential means of Sports injury prevention and management.

One could almost call it an ideal drug-free therapy which utilizes tape to immobilization, promotes healing and pain relief.

Highlights:

- comprehensive and fascinating lecture Portion
- A minimum of 70% hands-on workshop time,

Upon completion of this workshop, students will be able to do the following:

- Display a substantial understanding of the development and use of effective techniques for athletic taping technique.
- Understand how the work of athletic taping technique flows from and is connected to underlying anatomic and physiologic principles.
- Display knowledge of the benefits, contraindications, and precautions of athletic taping technique

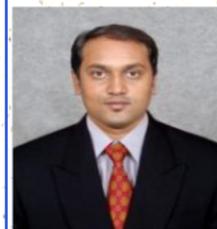

This two days' workshop is designed for Students (MPT&BPT), Physiotherapist, Sports Practitioners, Sports Therapists, Coaches and Others Working in the Physiotherapy Rehabilitation Environment.

Dress Code: The participant should come in track suit for facilitating skill learning.
